

Characteristics of Patented Product

Mild & comfortable

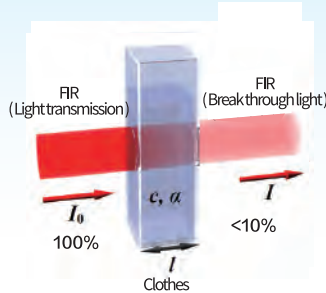

Like light wave, intensity of FIR is higher while distance closer. As temp of radiation product is very high (>200), it requires 30 cm distance while using, lower treatment effect greatly. Attachment type does not require high-temp to radiate FIR, the process is safe and comfortable.

Relationship between intensity of treatment and its distance

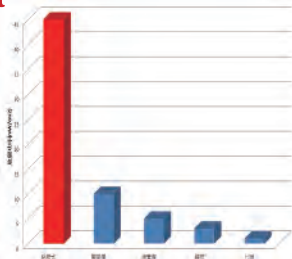

Easy & Convenient

FIR is easily shield by clothes (>90%). It is necessary to expose the treatment position while use radiation product and attachment type can be put directly inside clothes, it is more convenient, private, and more effective.

Quick and Obvious Effect

Normally, FIR product only emphasize radiation rate, but actually the radiation power rates is the key of treatment effect. The radiate power rate of Haruki FIR is 45 mW/cm² after certify from Korean national lab, 5-10 times of effect than current normal products.

HARUKI product and market product

Light and Energy-Saving

Attachment type FIR products is soft and comfortable, can be directly attached to treatment position, Easy-operation, convenient-use, small size and not take too much space, energy efficiency high (>90%) suitable for both professional and personal.

Easy Wear S For neck, hands, legs and feet

- ⊙ Stiff neck
- ⊙ Tennis Elbow
- ⊙ Carpal tunnel syndrome
- ⊙ Knee osteoarthritis
- ⊙ Gout
- ⊙ Rheumatoid Arthritis
- ⊙ Plantar fasciitis
- ⊙ Varicose veins
- ⊙ Cold hands and feet
- ⊙ Strains, sprains

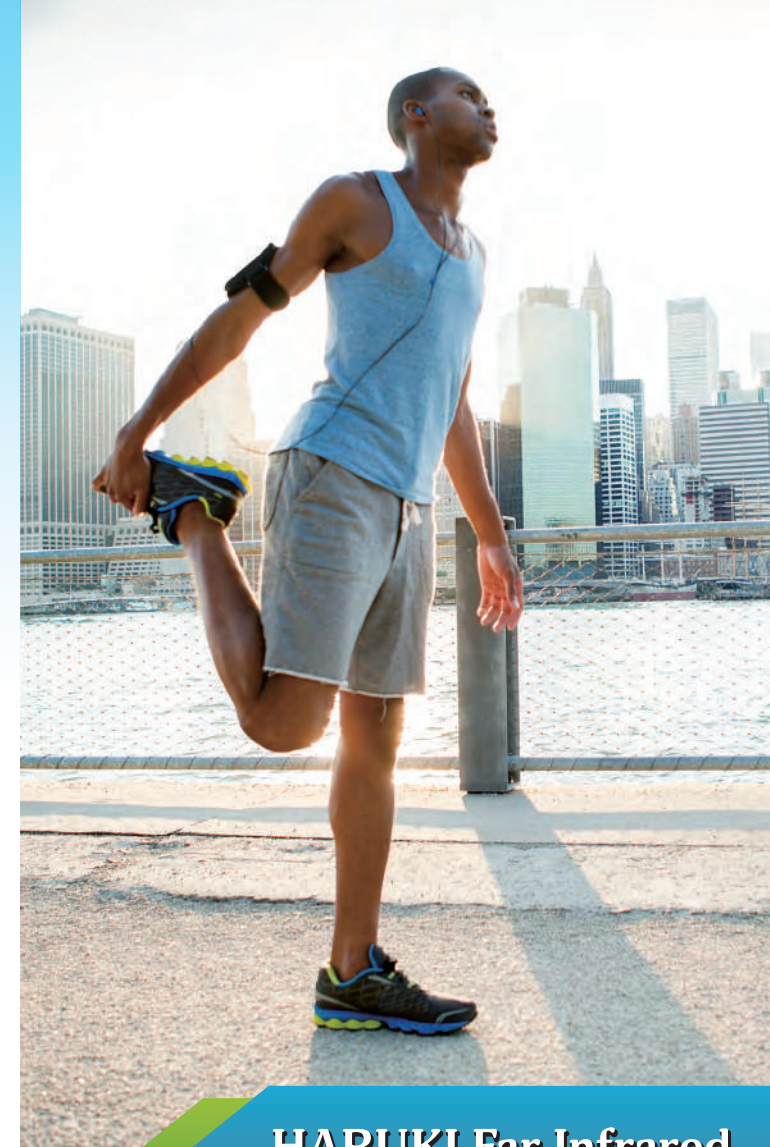

Easy Wear L For shoulder, back, waist, butt

- ⊙ Frozen shoulder
- ⊙ Scoliosis
- ⊙ Degenerative cervical syndrome
- ⊙ Lower back pain
- ⊙ Spur
- ⊙ Sciatica
- ⊙ Menstrual pain
- ⊙ Prostate inflammation
- ⊙ Prostatism
- ⊙ Strains, sprains

 Email: wine.font@msa.hinet.net http://www.ok1fir.com

Characteristics of Patented Product

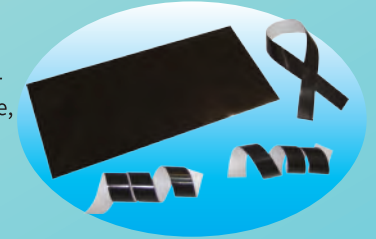

Natural raw material

Selecting from Natural raw material with far infrared radiation, through fine grind into nano powder and proprietary formulation process, only by body temperature can reach 85% radioactivity, and more than 90% after heating.

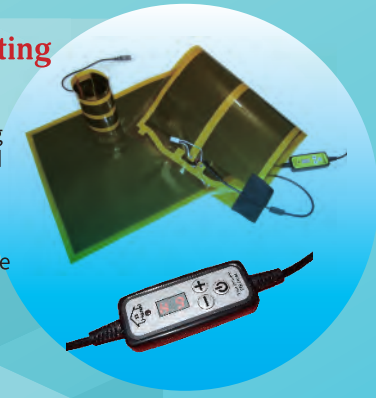

Soft ceramic film

Innovative FIR ceramic powder and high temperature tolerable, non-toxic soft gel mixed into brand new FIR film materials. There are patents acquired world-wide.

Nano carbon film heating

Special nano carbon heating film, get rid defects of conventional unevenly heating and power consumption, rapid temp-raise. High efficiency, bendable, no EM, applied intelligent power & temp control, can reach effect of time and temp set.

Multination research certification

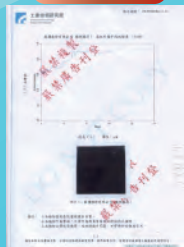

Haruki FIR had been certified by multination research and acquired patents from multination.

Black Light Pearl

Your easiest way to have personal pain relieved and health care

For Busy Days

You need 24 hour nurse

According to Nobel medical award of year 1998, Far Infrared can promote cell to generate NO, and NO can expand blood vessel, accelerate blood circulation, activate cell mechanism, delay aging and promote immunity. Far Infrared is your best companion for daily health-care and body-care.
